These skills are categorized into various areas such as Applied Mathematics, Reading for Information, and Locating Information. The goal is to establish a standardized way to measure a candidate's readiness for job tasks that mirror real-life work scenarios.

Locating Information is one of the core assessments, often serving as a prerequisite for many job roles. It specifically measures an individual's ability to scan, identify, and interpret information within workplace documents like memos, charts, graphs, forms, and manuals.

The Structure of the Locating Information Test
